

FRANK R MIGNONE

LETTERS OF RECOMMENDATION

Flying Lab Software

I would like to just take a little time and comment on the two beautiful user ships that Frank "Spankybus" Mignone created for our game. It's my job at Flying Lab Software to process all of the ships into our game "Pirates of the Burning Sea". He has completed two historic ships so far that will be shipped with our game this year. These ships, the West Indiaman and the East Indiaman, are two of the largest user ships that we've received to this date.

His attention to detail is incredible. A lot of the user ships end up going through rounds of edits because we have strict guidelines for ships before they can be converted to work in our game. With Frank's ships they were all in order. We require that the normals are facing the right direction, that there are no double-sided or opposite polygons, no gaps, and that the ship is historically accurate. Frank had no problem following these guidelines. His ships were probably the closest out of the user ships to our official ships (built by Akella). His ships are getting bigger and better. I can't wait to see what comes out of him next.

'Silgrad Tower' – Worlds Largest Mod Team for 'The Elder Scrolls' Games

"We couldn't be happier about working with Frank. He's done a great job on modeling a set of prefabs, which will allow us to assemble a particular type of locations in our upcoming game mod. His insights into real-life architecture were very beneficial during this process, as it added a heightened touch of realism to the project. We're grateful for his time and effort, and I'm confident the tens of thousands of future players of our game mod will agree!

Razorwing,
Admin of the Silgrad Tower

To Whom It May Concern:

I am writing this letter to acknowledge the skills, attitude and abilities of Frank Mignone, whom I have known for a short time as a student here at Full Sail. It is my professional, ad personal pleasure to recommend Mr. Mignone for any position he may seek in the future, knowing he is not only capable of performing his assigned tasks, but is also enthusiastic about engaging in new prospects and acquiring new skills.

Frank was a dedicated student, punctual, conscientious and self-sufficient, with excellent communication skills. It has been my experience that once an assignment was given and requirements outlined, Mr. Mignone required little assistance and was always in a position to submit a superior product to specification at each deadline. While this may be regarded as standard for any student, one must understand Full Sail to appreciate the statement. We supply knowledge on a compressed schedule taking only one month to accomplish what most schools do in three. We run lectures and labs twenty-four hours a day, seven days a week and assignments can be given one day and due the next. It is a true feat to accomplish everything we ask in the time frame to the degree that Mr. Mignone consistently provided. It is with that in mind that I offer my recommendation for Mr. Mignone and support him in his future endeavors.

If you would like to speak with me further regarding Mr. Mignone I can be contacted via e-mail at sakehurst@fullsail.com or by phone at 407-679-0100.

Sincerely,

Steve R. Akehurst

LinkedIn.com Recommendations

PROGRAM MANAGER & ART DIRECTOR

Harrington Group

“Frank has done an outstanding job of understanding and executing complex technical projects, which required communicating with multiple stakeholders spread out across the country. I highly recommend Frank lead your next project if he is available, and that he take a key role in the technical architecture of your training and simulation initiatives.” *July 13, 2010*

Top qualities: Great Results, Personable, Expert

[Andy Morris](#),

hired Frank as a Project Management in 2009, and hired Frank more than once

“Frank is one of the few people I know who can unconditionally be counted on to make sure a project gets done. He is willing to put in extra hours to make sure everyone is up to speed and producing at their best. He takes responsibility for himself and his team and does so with a smile. He also has a great eye for detail and is a very well-rounded artist. It would be rare during production to run into a problem he couldn't help with.” *May 18, 2009*

[Pete Sedlacek](#), 3D ARTIST, HARRINGTON GROUP

reported to Frank at Harrington Group

“I've learned a lot from Frank about gaming and continue to do so at present. He is very knowledgeable and confident in his skill set and in my short time working with him, he has worked hard and vigorously to consistently meet deadlines. As a lead on projects, he shows great organizational and managerial skills. I would be happy to recommend his talents and believe he would be an asset to any art team.” *May 4, 2009*

MODELER

Frelance - Flying Lab Software

“Frank was one of the early and passionate advocates of Flying Lab Software's user-created content program. His numerous flag and sail contributions were top-notch, but where I really gained an appreciation for him was in the user-created ships program.

At the time, Frank was just starting to learn 3D, but that didn't stop him from taking on one of the most challenging technical modeling projects he could find. He produced three different ships for us, each over 50k well-used polygons. Even at that early date, his models were clean and professional, he was receptive to feedback, and he was dedicated to doing a good job. And to top it all off, he became a positive and outspoken community leader, helping others through the process: patiently and clearly answering questions, giving support, and offering constructive feedback to help others achieve the best results possible.

Frank was a pleasure to work with, and I'm sure that he would be a great addition to any team.” *September 5, 2008*
